And take the advice from the doctor by the message communication module by the alarm or by the APNS service.

ClinkR (iPhone) - ProdIntel Technology

CLinkR (Connection Linker) provides ability to reference a person via a trusted network. CLinkR helps you find those shared connections that exist in the real world but are missing in the online world. From finding a plumber, to getting the number of the person you met at a party. From getting common reference for the interior decorator you are about to hire, to finding references for the bridegroom. References are used everywhere. CLinkR helps you find those shared connections. You can then call or text your common connection to get reference.

CLinkR also helps you find and discover people. Search for everyday services that you need. Your social circle most likely has the number! Discover who has it and then ask him for the number. No more hassle of calling 100s of people to find out that one person who actually has the connection.

Yota (iPhone) - ProdIntel Technology

Yota is Your Own Technical Assistant accessible over Chat. Yota application allows the user to chat with Yota assistants for the services. YOTA admins are allocated to the users depending on the criteria of least busy and if all yota assistants are busy/unavailable then the mechanism to handle the user messages as offline messages is been implemented and the next available admin will be able to continue to communicate with the user along with the offline data.

Yota system has a My Services which allows users to add vendors from the YOTA system and can communicate with this verified vendor for better and specific services. User can send plain text messages, emoji's, post image from camera/gallery and also user can share the location at the sametime. This whole system core system comprises of the XMPP server, production server, web-app and mobile application which implements XMPP client.

VanityCube (iPhone) - ProdIntel Technology

VanityCube is on demand beauty services application. VanityCube application allows the user to register and book the beauty and spa services for home. User will be registered, once the OTP verification is done. System allows the registered users to browse and search available beauty services and filter them by price, location, discounts. Referral bonus, discounts are the benefits you can apply from the VanityCube application. User can book the beauty services and also view or cancel the bookings from the booking history.
